BOOKS FOR TODAY'S WORLD

A reading list compiled for Montana Home Demonstration Club
members by the Montana State Library Extension
Commission, South Avenue and Middle-
sex, Missoula, Montana

This list is meant to give you some idea of the many kinds of books that are available to you from the Extension Commission or from an adequately supported local library. It is suggestive only and may point the way to other topics which you can read about in "library books". We have books on many subjects that are not even touched on in this list and a good local library should have such books, too. Moreover, for each of the subjects we mention, there are many excellent books in addition to the ones we have listed here.

If you have no local library, you can borrow these books directly from us. If you have a local library but it does not have the books you want, you can borrow them from us through your own library. But unfortunately our book collection is not nearly as large as it should be to serve our big state. Because of our limited budget we have usually purchased but one copy of each book. Therefore you will get faster service if you suggest that we substitute another book should the one you ask for be in circulation. Frequently it is more satisfactory to ask for books by subject.

Maybe you know someone who has a personal problem such as a tendency to worry too much. If so, we or your local librarian may be able to find a book that will help solve it. Library books cannot take the place of medical advice in solving deep-seated psychological problems. However, they can often help with everyday ones.

There are no limits to the number and variety of friends that you can find through biographies and autobiographies -- books in which the author tells about the life of another or books in which the author tells about himself. Through books of fiction, also, you can find a wealth of friends. We have not listed fiction books here simply because we think people are more aware of them than they are of books of non-fiction.

Do you like to relive the days of the Old World and so gain an understanding of the present or do you like to read about the history of our own country or state or about more recent times in other countries? There are many books for all these interests. Historical fiction will also help you to know and understand the past. If you like to get your history that way ask for fiction with a historical background and tell us what country or what period interests you.
